

# SPECIAL PROMOTION FOR GEOTECHNICAL ENGINEERS

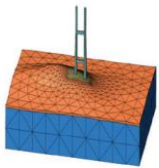

Enhance Your Daily Design Practice

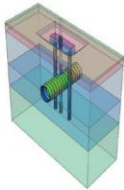

2D	3D	2D & 3D
<b>Starting From: 1,750 Euro</b>	<b>Starting From: 2,500 Euro</b>	<b>Starting From: 3,750 Euro</b>

## Full range of geotechnical analysis for 2D and 3D - All in One solution

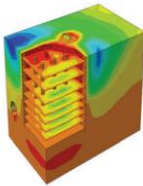

GTS NX supports various kind types of analysis including static, dynamic, seepage, stress-seepage coupled, consolidation, construction stage and slope stability analysis. GTS NX is the proven numerical modelling software used by many international geotechnical firms. Selected practical applications of GTS NX are shown in the below.

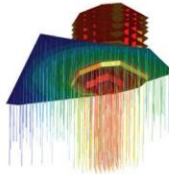

Foundation

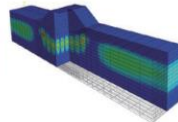

Metro

Deep excavation

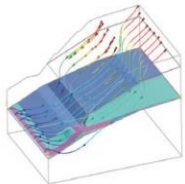

Pile foundation

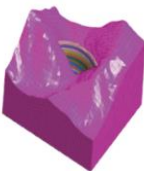

Consolidation

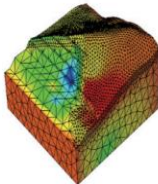

Tunnel

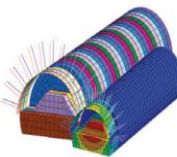

Seepage

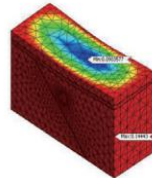

Dam

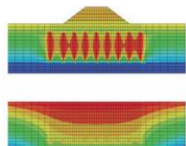

Slope stability

Construction stage

Dynamic

Ground improvement
